

Ntgrate Antislip

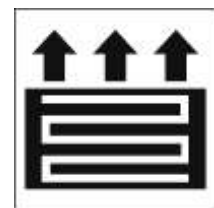

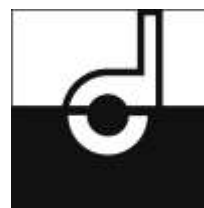

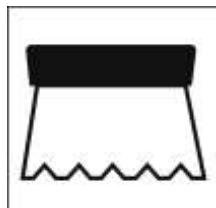

waterborne slip-preventer

Properties:

- ▲ very low emissions
- ▲ with permanent tack
- ▲ easy application with roller
- ▲ fast drying
- ▲ long open time
- ▲ approved quality
- ▲ odourless during and after laying
- ▲ very low consumption
- ▲ tenside free – non reemulsifiable
- ▲ GISCODE D1 – solvent-free
according to TRGS 610

Application:

- slip-preventer for dimensionally stable textile floorings with fleece backing and carpet tiles
- for absorptive and non-absorptive substrates
- suitable for castor wheels and underfloor heating
- for healthy living conditions

Technical Data Sheet

»for dimensionally stable textile floorings«

Technical specifications:

Consumption/trowel notch:

approx. 100 g/m²

Application with foam-roller medium fine (art.no. 170425) or trowel notch A1-A2.

Application temperature:

minimum +15°C,

relative humidity not over 65 %

Open time:

approx. 30 minutes

(after getting a tacky, transparent film)

Temperature resistance:

After drying (approx. 72 hours after bonding) suitable for floor heating systems up to +30°C.
